

Kindle Users Group

November 2011

Sixteen attended!!!!

Kindle Users continues to be an active users group for the HSV Computer Club. Discussed today were many topics that are already on our web page, **cchsv.com**.

I will highlight a couple of items, however, the **library information** is already on the cchsv web page so please refer to that for review.

To **access the internet** on your Kindle, from the Home page, click on MENU, curser down to EXPERIMENTAL, choose that and it will take you to the WEB BROWSER and if your internet connection is not on you will be prompted to turn it on. Once on, you can put any address in the URL address line and go from there. If you want to enlarge an area because the text is so small, use the enter key, (center of five way controller) move the box around on your screen using the side/up and down arrows on five way controller, until you have the box where you want it, then hit the enter controller again and what is in the box will enlarge so you can see it better and continue your search or connection to your e mail. It helps to have a Gmail account which is easy to set up from Google web page.

Archives and making folders is also on the **Web page**, so check it out. **cchsv.com** You may email questions to me at gadgetgal66@live.com

If you want to check your Kindle Books from **your account in Amazon**, Click on **Manage My Kindle**, which will show you all your books on Kindle, tell you if they are loanable, if they are from the Library, or whatever by clicking on the **ACTION** tab on the right of each book!

Happy Reading!!!!!!
